

Happy Thanksgiving @ Puzzlium

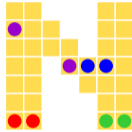

Remove all green dots but one. A green dot is removed after an adjacent green dot jumped over it on the gray cell.

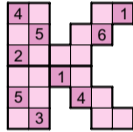

Going along the white lines of the grid, cut the shape into 4 identical parts. Parts may be rotated and/or reflected.

Fit all the pieces within the brown shape. Pieces can be rotated / flipped, but not overlapped.

Connect each pair of identical dots with a single continuous line. Lines should cover all cells of the shape.

Fill in the grid so that each row, column, and region contains different digits, 1 thru 6.

Going along the white lines of the grid, cut the shape into 5 identical parts. Parts may be rotated and/or reflected.
